

NEW training course.....

This course is designed to refresh and consolidate existing knowledge of Functional Electrical Stimulation (FES) and the ODFS® Pace stimulator for the lower limb. It offers up-to-date content to reflect best practice in FES set up and application.

It's aimed at clinicians who have previously completed FES training but may not have had the opportunity to practise using FES on a regular basis. Volunteer patients will be available to practise set up on.

Previous FES training doesn't necessarily have to have been with OML, but prior knowledge of FES for the lower limb is assumed. This course will be held at various locations across the UK or we can host the course at your venue.

Please visit our website for more information and to register for the course:
