

We have OML Functional Electrical Stimulation (FES) clinics across the UK.

All Functional Electrical Stimulation enquiries and referrals should be directed to our patient support team on:

☎ 01722 439 540 (option 2)

or

✉ oml.sft.patientsupport@nhs.net.

We will deal with all initial enquiries from a patient or healthcare professional and then following referral and triage, we will arrange an assessment with an available OML clinic.
